RECAP

CONCEPTS, A

CSS styles from anywhere can be integrated

So do AV resources: files to be linked

CONCEPTS, B

The DOM representation

for each leaf, a special **innerHTML** variable will contain the relative text and mark-up

CONCEPTS, C

Page animation: Javascript (JS)

```
1 <button type="button" onclick="changeSeason('summer')">Verano</button>
```

A new tag for buttons

A *listener*: if we click then the *action* associated to **onclick** is executed

A Javascript function **changeSeason()** is called, with input value **'summer'**
